RE: Olin Corp./McIntosh Plant Superfund Site
McIntosh, Alabama - Technical Meeting on February 19, 1992

Dear Mr. Brown:

This letter is to confirm the meeting scheduled for February 19, 1992 at 10:00 a.m. in our office. During our conversation of February 4, 1992, we briefly discussed possible agenda items. Primarily, additional sampling will be required in Operable Unit Number 1 (Plant area). Consequently, another sampling episode will be required prior to submittal of the Preliminary Site Characterization Summary Report scheduled for submittal on or before April 16, 1992.

Please be prepared to discuss your comments on the RCRA Facility Assessment Report (RFA), the aerial photography analysis (performed by EPA EPIC) and our letter dated January 30, 1992. EPA is basing the need for additional sampling on the results provided in these documents.

If there are any questions, please do not hesitate to contact me at (404)347-2643.

Sincerely,

Cheryl W. Smith
Remedial Project Manager
South Superfund Remedial Branch
